AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of claims:

- 1. (currently amended) A molding apparatus for press-forming for providing a core material with a step comprising:
 - a frame;
 - a die provided on the frame, and on which a core material mounted;
- a stripper pressing and releasing the core material mounted on the die by moving toward or away from the die;
- a punch holder disposed on an upper part of the stripper, and supporting a punch which forms a step in the core material;
 - a press slide moving the punch holder toward or away from the die;
 - a linear motor reciprocating linearly and controlling a linear position of the die; and
- a linear joint block <u>laterally aligned with the die and</u> connecting the die <u>toand</u> the linear motor, <u>the linear joint block</u>and transmitting the linear reciprocation of the linear motor to the die.
- 2. (original) The molding apparatus according to claim 1, wherein the die and the frame have scrap discharging holes to discharge out scraps generated after a punching process by the punch.
